## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 were previously rejected under 35 U.S.C. 102(b) as being anticipated by Baldszun et al. (4,560,269). **This rejection remains in effect.** Please see Response to Arguments below.

### ***Inventorship***

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 1743

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claims 5 was previously rejected under 35 U.S.C. 103(a) as being unpatentable over Baldszun et al. (4,560,269) in view of Tanner et al. (6,767,607).

6. Claims 7 was previously rejected under 35 U.S.C. 103(a) as being unpatentable over Baldszun et al. (4,560,269) in view of Farina et al. (6,752,967).

**These rejections remain in effect.** Please see Response to Arguments below.

***Response to Arguments***

7. Applicant's arguments, filed 4/14/2005 with respect to the references Demers and Oldenburg have been fully considered and are persuasive. The rejections of claims 1 and 6 using these references have been withdrawn.

Art Unit: 1743

8. Applicant's arguments filed 4/14/2005 with respect to the Baldszun rejections have been fully considered but they are not persuasive. In traversing the rejections under Baldszun, applicant has argued that Baldszun does not anticipate claim 1 since the elongate sidewall portions are not separate walls. This argument was also made in the rejection of claims 5 and 7. Applicant arguments involving the combination of the references Baldszun and Tanner are directed to applicant's assertion that Baldszun does not teach a planar wall/window. The Examiner respectfully disagrees. The Examiner had already noted in the previous action that the side walls form a curved surface at the junction (18-21) of the walls and with the bottom of the container. But the Examiner still believes these walls are separate and parallel. Figure 5 clearly shows two parallel walls in the device (14, 15). Since the device is transparent (column 1, lines 5-10), the Examiner believes these walls meet the limitation of opposing walls having planar, parallel optical windows. In addition, the Examiner notes that while Baldszun does provide lenses for focusing light through one wall of the device, Figure 9 shows an embodiment of the device that includes planar surface 31 as part of the lens element. The Examiner believes this also would be a planar parallel surface that is an optical window.

***Allowable Subject Matter***

9. Claims 4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
